CS 744 – Software Project Management
Project Meeting

Project title: Front Dash
Group name: Blue
Meeting #: 3
Held on: Feb 5, 2024 at 10:00 A.M.
Location: WING 218
Members of the group: Tanner Turba, Matthew Moyer, Samuel Evanson
Members attended: All
Topic(s) for discussion: Server status, user stories, and sprint items.
Report writer: Tanner Turba

Attendance:
All members were in attendance for this meeting.

Work on assigned tasks:
Tanner had worked on setting up the server by installing all necessary dependencies and initializing the database, which can be accessed through http://138.49.184.184/phpmyadmin/index.php?route=/. He shared all necessary information with everyone so they could access the server and the repository to begin working on sprint tasks that would be assigned later at the meeting.

Current task:
The team worked through the requirements document and created user stories. Afterwards, these stories were converted to sprint task items and assigned to each individual for the first sprint.

Assignment of work:
Tanner volunteered to keep working in the backend to set up a Prisma ORM to interface with the database and create all necessary logic for user authentication. Sam took a sprint item to create a login page, and Matt decided to take the landing page and dashboard.

Next meeting and its agenda:
Updates on sprint items and hopefully putting all the pieces together for the first demo.
